DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ofuchi (JP 10-81815).

Ofuchi discloses a resin composition comprising aliphatic polyester such as exemplified polylactic acid (paragraph 0051); a plasticizer such as exemplified polyethylene glycol (Table 1, example 1); and 0.05-15 wt % inorganic additive such as exemplified silica (paragraphs 0032-0033; Table 1, example 1) which is Aerosil 200 (i.e., a silica having a particle size of 12 nm as defined by applicant on page 12, line 19 of the instant specification).

Ofuchi does not exemplify a composition with more than 5 wt % silica.

Even so, given that the amount of silica taught by Ofuchi (0.05-15 wt %) overlaps with the presently claimed range (10-100), it would have been obvious to one of ordinary skill in the art to utilize any amount taught by Ofuchi, including those that falls within the presently claimed range with reasonable expectation of success.

Art Unit: 1796

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 4,101,422 cited on the international search report has not been used in the above prior art rejections because it does not disclose plasticizer.
